Tom Christian, UI Developer / Designer

Senior UI Developer & Designer with seven years of commercial experience in various industries. I specialise in designing & developing webapps & responsive websites. Keen follower of Agile & iterative design backed by A/B & multi-variant split testing

EXPERIENCE

Front-end Developer, Salmon Jan 2017–Mar 2017
- Backbase CXP & AngularJs consultant working within the HSBC embedded team

Front-end Developer, Tribal Worldwide Nov 2016–Jan 2017
- Building Unilever product websites upon a SASS, Backbone.js & Handlebars powered framework

Front-end Developer, Audio Network Jul 2015–Nov 2016
- Converted the front-end of Audio Network's existing website into a responsive solution powered by Bootstrap and SASS
- Built the front-end of a SPA music library plugin for Adobe Premiere Pro using Angular 2 (written in typescript) and SASS
- Setup front-end tooling with gulp.js to support building of SASS components, JS modules and icon fonts
- Designed a cross-platform (OSX/Windows) Electron based installer for fast delivery of the Adobe plugin
- Wrote unit tests in Jasmine using the Karma test runner & e2e acceptance tests with protractor
- Delivered incrementally in two-week sprints with key decisions arising from extensive A/B and multi-variant testing

Front-end Developer, Concise Media Design 2012–July 2015
- Designed and developed the UI of Concise's flagship event product with OOJS and SASS
- Developed a bespoke medical simulator app for a leading diabetes pharmaceutical client used at a conference by 900 attendees. Built with AngularJS, PHP and SQLite
- Developed an analytical reporting tool to output statistics of app usage during live events. Built with jQuery and Flot.js
- Worked with key clients such as Adidas, Accenture, Bank of America, BT, Shell, Goldman Sachs, Morgan Stanley, JP Morgan, UBS, HSBC, Novo Nordisk and VISA

Front-end Developer, Web Infinity Jul 2011–Sep 2011
- Developing jQuery powered user interfaces for Web Infinity with clients such as NetApp, Iomega and UK Gigs Online

Front-end Developer, Invision Power Services 2009–2011
- Hired after becoming the most trusted and profitable 3rd-party theme developer within the forum community
- Tailored Invision's community forum platform to integrate with the brand & UI of major clients including NFL, NHL, NBC, Warner Bros, Skype, Roxio, Intuit and Baltimore Ravens
